

WISE LIFESTYLE

About us:
The Wise Lifestyle Technology Company works with some of Europe's finest technical & chemical engineers, medical specialists and inventors. Together we are producing a new generation of groundbreaking technologies in the areas of agriculture, energy and health.

*Clearing the way
to higher yields!*

- More Yield
- Better Quality
- Healthier plants
- Healthier animals
- More production
- Less pesticides
- Less antibiotics
- Lower mortality
- Increased germination

HyperSound Technology

Product Information

**A BRILLIANT INVENTION TO
IMPROVE AGRICULTURE**

With our **HyperSound Technology** we bring a healthy optimal vibrational environment to your farm that will help it to flourish.

With our HyperSound Technology we significantly increase the growth, yield and health of plants and animals. HyperSound Technology targets all man-made electromagnetic disturbances and creates a powerful harmonic vibrational field that is highly beneficial to living organisms.

By treating water, fertilizer, seeds, soil and air we optimizing all metabolic processes. This results in better overall health and decreases the need of antibiotics and pesticides.

OUR PRODUCTS

- Easy to install
- No electricity involved
- Self Powered
- 100% natural and safe to use
- Produced & shipped within 6 weeks
- German Quality
- 7 year warranty

We customize our technology to tailor fit the specific needs of any of our clients and optimize results.

Here some examples of customized devices:

HyperSound Liquid 2"
2" Multiple purpose Egg device for water and fertilizer.

HyperSound Gravity 3"
Charges seeds at the speed of gravity.
3" Multiple purpose Egg device for seeds, water and fertilizer.

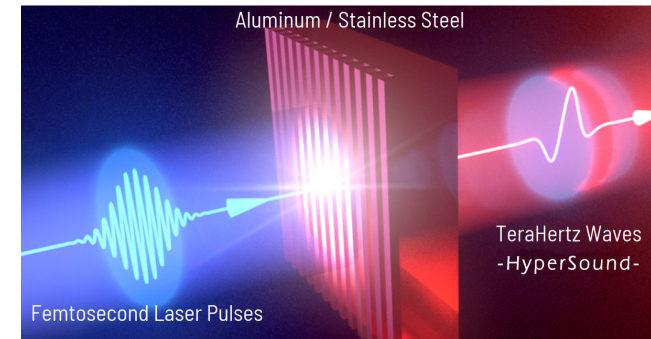

HyperSound Gravity 6"
Charges seeds at the speed of gravity.
6" Multiple purpose Egg device for seeds, water and fertilizer.

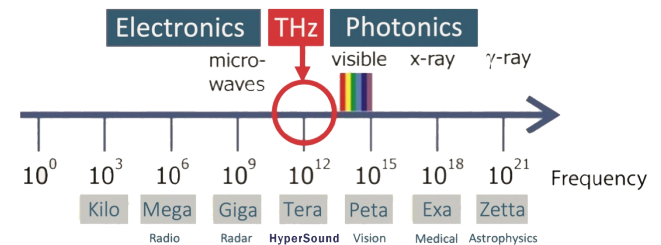

Behind the Tech: Femtosecond Laser

HyperSound charging is produced with femtosecond Laser technology. This hyper-fast laser alters the inherent properties of metal and special crystalline materials, to create new quantum state. In this new and permanent state the metal/crystal continuously generates a unique set of beneficial EMF vibrations that increase the natural-harmonic core functions of organic cells and also counteracts the negative side effects of wireless technologies and other electronic machines.

All this happens on the TheraHertz frequency band which is nature's information Highway. This frequency spectrum can activate metabolic functions and exchange information between cells and organisms. TheraHertz frequency technology is building the bridge from traditional science to a completely new area of fantastic technologies.

Biological EMF algorithms govern nature with mathematical precision to maintain a state of coherence. Our HyperSound Technology uses these intelligent algorithms and restores a state of coherence on your farm.
