HyperSound test plot layout — 24-row planter

Untreated and treated strips side by side, three replications, untreated seed always planted first.

Wise Lifestyle

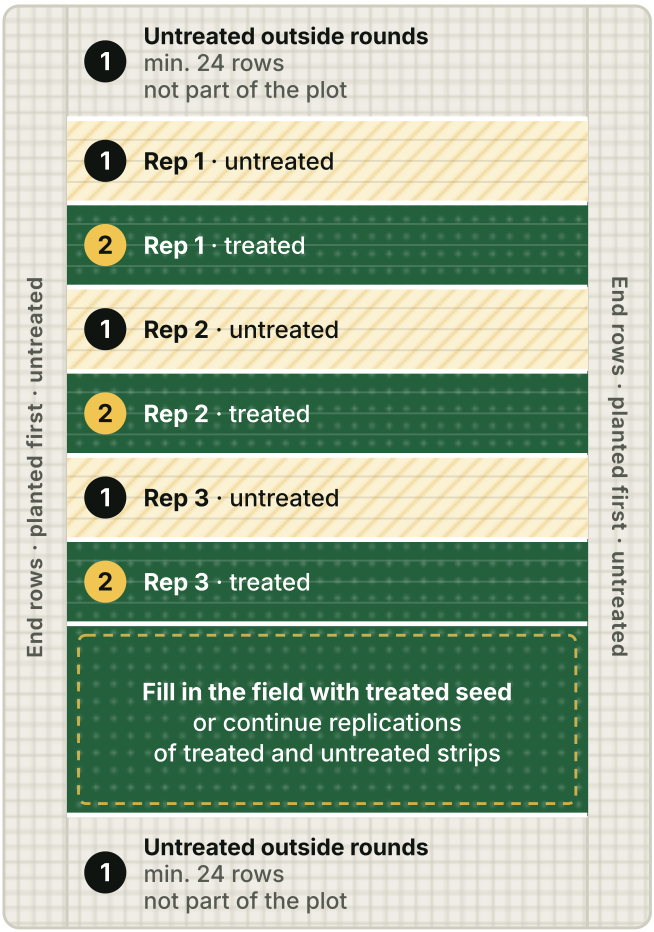

HyperSound test plot layout

PLANTING ORDER

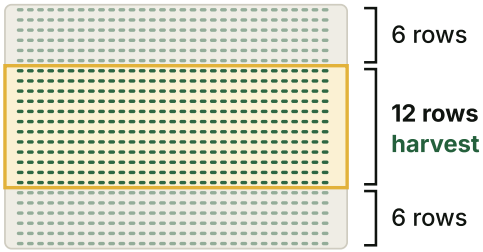

1 Untreated seed: plant first

2 Treated seed: plant second

Outside rounds and end rows: untreated, plant first

One strip, 24 rows: harvest the middle 12

Drawing not to scale. Each strip is 24 rows wide, one pass of the 24-row planter.

Layout by Terry Good, HyperSound North America

Do's and don'ts for a 24-row planter

Keep seed apart

1. Keep untreated seed 20–30 ft away from the device.
2. Keep treated seed 20–30 ft away from untreated seed.

Planting

3. Plant the untreated outside rounds and the untreated strips first.
4. Plant the treated strips second.
5. Never split the planter between treated and untreated seed.

Harvest

6. Harvest the middle 12 of the 24 rows in each treated strip.
7. Harvest the middle 12 rows of each untreated strip.
8. Combine the same number of acres of treated and untreated corn.
